

## Interpon A: Powder Coatings for the Automotive Industry

# Interpon A

## The Driving Force in Automotive Powder Coatings

**Interpon A** is the name in powder coatings for the automotive market.

Whether its excellent chemical and corrosion protection for underhood parts, high gloss, first rate smoothness and super durability for exterior trim, or superior transparency and clarity for alloy wheels, **Interpon A** delivers. The **Interpon A** assortment offers first class, durable powder coatings that will protect, enhance and decorate all types of substrates for anything you can drive.

## Innovation at its Best

The **Interpon A** range is supported by the expertise that comes from being the number 1 coatings company and a market leader in powder coatings technology. Continual innovation is essential. AkzoNobel Powder Coatings were the first to formulate super-durable polyester monocoat powders, now approved by all leading automotive companies around the world. AkzoNobel Powder Coatings is leading the way in low temperature cure powder products.

What's more, the **Interpon A** range benefits from patented technologies such as Dual Coat system for high tensile coil springs or Particle Management Technology (PMT). AkzoNobel Powder coatings have the technical expertise, dedicated support teams and market experience needed to ensure that **Interpon A** is always one step ahead.

## Global OEM's are Our Partner

All the OEM's in Europe, (eg. BMW group, VW group, Daimler), in NAR (eg. GM, Ford and Chrysler) and in Asia (Toyota, Honda, Nissan and Hyundai) are working with our technical and design teams to select the most suitable solution for their high demanding programs.

## Encompassing an array of automotive applications, the Interpon A range includes:

- Interpon A 1000 Underhood/Underbody
- Interpon A 2000 Trim
- Interpon A 3000 Motorbikes
- Interpon A 4000 Wheels
- Interpon A 5000 OEM Body Shell

## Interpon Powder Coatings – the Environmentally Friendly Option.

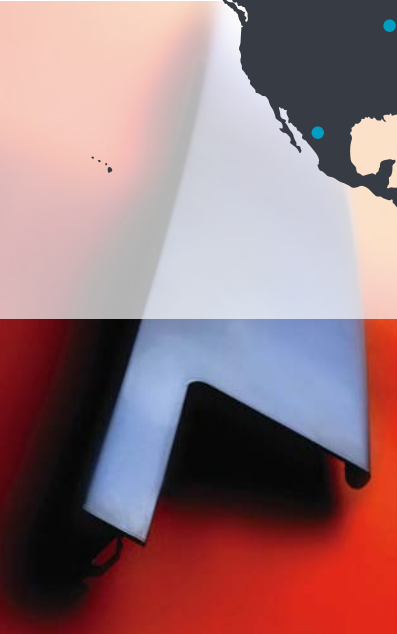

With **Interpon A** Powder Coatings, there are no Volatile Organic Compounds (VOC's), no toxic heavy metals such as lead or chromium (VI) and there is almost no waste as any overspray can be reclaimed and recycled or reprocessed. That's why with Interpon Powder Coatings, Every Color Is Green.

Our team of technical experts perform audits at our customers request which help identify ways to optimize processes, efficiency and reduce energy cost and waste.

At AkzoNobel Powder Coatings we are proud of our commitment to sustainable and environmentally friendly products and technologies. We work closely together with our customers to help them meet their sustainability objectives.

## Global Capability, Local Service

AkzoNobel Powder Coatings boast a global manufacturing and supply capability. This means no matter which **Interpon A** product you choose, no matter where you are in the world, you benefit from consistent, quality coatings. The **Interpon A** range is also backed up by a worldwide support network and first class technical teams to ensure service excellence as standard.

## A Global Partner

And we listen. We work with our customers to produce coating options that work for our customers. The **Interpon A** range offers a variety of products that have a wide range of approvals of all major OEM's worldwide.

We are a global company with global reach. With over 30 manufacturing sites throughout the world and first class R&D facilities and centers of expertise, no matter where you are, where your customer is, where you order or where you want your powder delivered, you can be assured of first rate, consistent products, colors and services.
