ROSNER

2K EP Gießharz

The crystal-clear, transparent, solvent-free epoxy resin-based casting resin is perfect for embedding objects, mould castings and encapsulations. It is suitable for all common materials such like GRP, glass, wood, stone and also for professional use as, for example, manufacturing river tables, casting jewellery and model or mould making. High transparency and very good UV resistance characterize all applied layers.

Advantages at a glance:

- easy to apply
- high UV resistance
- coating without air bubbles
- hard, polishable surface
- up to 50 mm coat thickness without shrinkage
- free from solvent
