

:: Lackiergrundierung

primer

CHARACTERISTICS

This product is a nitro-cellulose-based primer with excellent anti-rust properties. This all-weather primer also dries quickly.

APPLICATION

Primer Surfacing Spray serves as an adhesive base and surface preparation for all paint jobs.

PRODUCT DATA

Material data:

Color: Gray

Solids by volume: 18 %

Recommended coat thickness: 75 µm wet, 35 µm dry

Theoretical coverage: 400 mL = 1-2 m²

Drying time (20°C): Approx. 30 minutes

Sanding time (20°C): Approx. 2 1/2 hours

Recoat time (20°C): Approx. 10 minutes

Hardened in (20°C): 2-3 hours

HANDLING

The surfaces to be primed must be clean, dry, and free of rust, grease and oil. Shake the spray can well for at least 2-3 minutes before use. Spray from approx. 25-30 cm (10-12 in) away from the surface. Apply thin coats in steady, even up-and-down and side-to-side movements.

PRECAUTIONS

Contents under pressure. Do not store at temperatures above 50°C.

SAFETY ISSUES

The before mentioned technical data and information, especially the recommendations for applying and using our products, are based on our current knowledge and experience when applied under normal conditions. In practice, the materials, surfaces or site conditions are so different that no warranty regarding the working results or liability, arising out of any relationship, can be inferred neither from this information nor from a verbal consultation, except we are charged with intent or gross negligence. In this case the user is obliged to prove that he has informed us about all points required for a proper and promising judgement in writing, in time and completely. Patent rights of any third party are to be observed. Furthermore, our general sales and delivery Terms and Conditions and the latest Technical Data Sheet, which should be demanded, apply.

Directions for handling and waste disposal are in our Material Safety Data Sheet and the specifications of the Employers Liability Insurance Association for the chemical industry.
