## RMC Hybrid Wood Protector

the ultimate allrounder for all your exterior wood

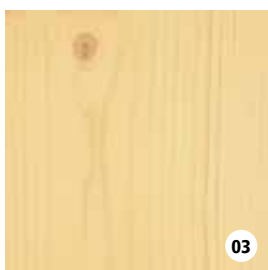

RMC Hybrid Wood Protector is a genuine 'monocoat', suitable for coloring and protecting almost all exterior wood in 1 single layer. The easy application and maintenance makes this oil an exceptionally user-friendly product. When adding 10% RMC Accelerator to the oil, it can be used perfectly for colouring and protecting interior wood.

### REMARK:

The pigment in the various RMC Hybrid Wood Protector colours contributes to the protection of the wood from greying. **ATTENTION:** The colour PURE is not pigmented, which will cause the natural greying to occur in exterior environments. | To further intensify the coloring, RMC Hybrid Wood Protector can be combined with an optional pre-treatment with RMC Sunprimer HWP. Please consult the technical data sheet of the RMC Sunprimer HWP for detailed instructions. | The colours shown are for reference only and are not binding. Results depend on the chosen wood type, method of preparation, etc. | It is always recommended to make a sample before applying the product to the complete surface.
